EDYODA PROJECT 1 : LIBRARY MANAGEMENT SYSTEM

By :- Satyam Swet

Guided by :- Mohit Singh Chouhan

Content:-

. Introduction

. System Analysis

. Use Case Diagram

. Class Diagram

. Flow Chart For Issue Book

. Flow Chart For Return Book

INTRODUCTION :-

The Library Management System is build using Python.
This system designed to help user to maintain and organise library. Packages, Module and concepts of OOP are mainly used to build this system. Librarian can add and remove book from system. Members are allowed to issue and return book also they can search book by name or by giving author name.
